41

The development hereby approved shall not commence until the following details have been submitted to and approved in writing by the Local Planning Authority:

- A CCTV camera survey of the existing drainage between the proposed development drainage and NWL chamber 6601, together with a scaled plan that identifies chamber invert and cover levels together with pipe sizes.

- A report detailing the condition and confirming the construction of the existing no dig porous paving (shown in green hatching on drawing JCC20-134-C-GA-100-D, within Drainage Strategy), together with the results of infiltration testing to be undertaken at

several locations along the route. Calculations to demonstrate whether there will be no runoff from this area under 1in100year+40% rainfall events should be provided. If there is reliance on the use of existing gullies to drain the access within the development site red line boundary, calculations demonstrating that the receiving system can manage runoff from the access under 1in100year+40% rainfall in addition to any other existing flows contributing to the existing drainage system must be provided. For the avoidance of doubt, all runoff generated within the site red line boundary must be accounted for and managed in line with DEFRA's non-statutory technical standards for SuDS to the satisfaction of the LLFA.

- A detailed topographical survey for the route of drainage between proposed attenuation tank and existing chamber CW2 (shown on drawing JCC20-134-C-GA-100-D) and should include all ground level features so that the overland exceedance flow route can be clearly defined and to demonstrate that there is viable access both for construction of the proposed combined water pipeline and also for long term maintenance of this infrastructure.

- Cross sections in two orthogonal directions through the SuDS storage facilities (both the geo-cellular units and the permeable paving that are identified as providing storage within the hydraulic calculations provided in support of the application).

Reason

To prevent the increased risk of flooding from any sources and to ensure an appropriate drainage strategy in accordance with the NPPF and policies CS17, MSGP29 and MSGP30 of the Local Plan

Reason for pre-commencement condition

42

The development hereby approved shall be implemented in accordance with the details approved under condition 41 and the Drainage Strategy (JCC20_134_C_02_02_Drainage Strategy (received 16.07.2021)) at all times and retained and maintained as such for the lifetime of the development.

Reason

To prevent the increased risk of flooding from any sources and to ensure an appropriate drainage strategy in accordance with the NPPF and policies CS17, MSGP29 and MSGP30 of the Local Plan

43

Reason

To ensure that the site is made safe and stable for the development proposed, in accordance with the NPPF and policies CS14 and MSGP20 of the Local Plan.

Reason for pre-commencement condition

The undertaking of intrusive site investigations, prior to the commencement of development, is considered to be necessary to ensure that adequate information pertaining to ground conditions and coal mining legacy is available to enable appropriate remedial and mitigatory measures to be identified and carried out before building works commence on

site.

44

The remediation and monitoring measures approved under condition 43 shall be implemented in full accordance with the approved timescales and the approved details.

Reason

To ensure that the site is made safe and stable for the development proposed, in accordance with the NPPF and policies CS14 and MSGP20 of the Local Plan.

Reason for prior to commencement condition

The site investigation and assessment of the risks of the site must be undertaken before the development commences in order to ensure that an appropriate remediation scheme suitable for the sensitive end use is identified and approved prior to commencement of the development, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors, from the beginning of the works.

46

Where required, the remediation and monitoring measures approved under Condition 45 shall be implemented in accordance with the details and timescales approved and in full accordance with the approved details.

Reason

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors, in accordance with CS14 and MSGP20 of the Local Plan.

47

Any undesirable material observed during excavation of the existing ground shall be screened and removed. If any areas of odorous, abnormally coloured or suspected contaminated ground are encountered during development works, then operations shall cease and the exposed material shall be chemically tested.
