

GATESHEAD METROPOLITAN BOROUGH COUNCIL
FAMILIES OVERVIEW AND SCRUTINY COMMITTEE MEETING

Thursday, 30 November 2023

PRESENT: Councillor M Hall (Chair)
Councillor(s): D Burnett, D Bradford, L Caffrey, B Clelland,
P Craig, K Henderson, H Kelly, K McCartney, J Mohammed,
R Mullen and D Robson

IN ATTENDANCE: Councillor(s):

APOLOGIES: Councillor(s): L Moir, A Ord, M Ord, D Weatherley and
Rachel Walton

F112 MINUTES OF LAST MEETING

The minutes of the meeting held on 19 October 2023 were agreed as an accurate record.

F113 PERFORMANCE MANAGEMENT AND IMPROVEMENT FRAMEWORK - SIX MONTH UPDATE - 2023-24

The Committee received a report on the Council's Performance Management & Improvement Framework, reporting performance on the delivery of Council priorities for the period 1 April 2023 to 30 September 2023. An overview was given of performance relevant to the role and remit of Corporate Resources Overview and Scrutiny Committee. The framework has been put together to support Gateshead Council's THRIVE strategy. It was noted that some metrics included in the report are annual measures which are reporting figures at a six-month mark.

A presentation was also given to the Committee on making data accessible for scrutiny, including a demonstration of Power BI and how this can be used to track data for the newly established Office for Local Government.

The Committee felt that the presentation of the data was not very accessible, as the text and graphics were too small to read properly.

The Committee queried the decrease in use of free school meals for primary school children. There is cross Council work ongoing with Services for Schools, the Education Team, and Schools Team. This work includes a survey on auto enrolment; some families feel that there is a stigma in accessing free school meals, there is work being done to address this culture. While auto enrolment would be a preferred option, the scheme is national and would have to be identically implemented across all participating local authorities. Gateshead is trying to be at the forefront of a pilot of this.

Further data breakdown was requested on the 10% of pupils who have missed significant numbers of lessons. It was noted that there is a lag in this data, as numbers for Autumn terms had not yet been reported. Attendance is a national priority, particularly following the COVID-19 pandemic. National and regional solutions to this issue are being pursued.

A detailed report is expected by Families OSC at the next meeting which will focus on looked after children.

RESOLVED

- i. The Committee noted the report.

F114 DELIVERY OF THERAPY SERVICES FOR CHILDREN - IMPACT AND OUTCOMES

The Committee received a report on the current delivery of therapy services for children in Gateshead, outlining the functions which the three therapeutic services (SALT, Physiotherapy and OT) deliver, the anticipated impact of receiving such a service and the outcome measures collated. Since the SEND inspection, progress has been made on waiting times.

Speech and Language Therapy (SALT)

Within Gateshead Health, there is a team of 24 Speech and Language Therapists who offer support and treatment to children within the Borough. The teams are linked with existing school provision, including special schools and ARMS provision. The impact of high quality, timely intervention can achieve the following outcomes:

- Provide learning opportunities for the development of skills, confidence, and competencies through a range of mechanisms and mediums including coaching, modelling and learning activities.
- Raise awareness of speech, language, communication and swallowing needs and their impact on an individual's ability to take part in day -to -day activities (especially in the workplace and educational settings) and advocate for children and young people's rights and needs.
- Provides reassurance, coaching and learning opportunities to enable families to support communication and swallowing development.
- Provides advice, training and support to early years, schools, community and other settings to foster inclusive environments.
- Develops and delivers evidence based functional interventions in partnership with children and young people, their families and others around them.
- Provide children and young people with access to approaches and resources so they can communicate.
- Provides training and support to families and other professionals so that they can safely support children with eating, drinking and swallowing.

At present the teams have been focusing on reducing the waiting times for an assessment through collaborative work with Portage, group work, parent

support and outreach. The number of children waiting for assessment has reduced by 77% since August 2023 with 4 children waiting over 18 weeks in mid-November. Patients are then appointed for a block of therapy dependent on clinical assessment. Work is ongoing to reduce this further.

Occupational Therapy (OT)

Within Gateshead there is a small team of specialist paediatric OT's who deliver targeted and specialist interventions to children on referral from universal services. Many children with the most complex needs require support and equipment to develop more personal independence, OT's have skills that allow them to do so and without their input children can become socially isolated and marginalised.

OT's select interventions for children based upon an assessment of the child, whether they are affected by disability and how their environment supports or constrains them in reaching their full potential.

The team is working on reducing the waiting times for Paediatric OT. Full recruitment has now taken place and they have commenced a number of new initiatives, focusing on group work sessions and structured information support, as well as working with colleagues across the region to build on successful programmes such as "Sensational Thinking" which delivers two sessions for patients with sensory challenges to support them and their families to address any issues which they have. These alternatives to traditional ways of service delivery will yield results with ambitious plans to reduce the waiting list significantly by March 2024.

There remains a significant wait for these services, details of which can be found at point 6.

The team collect outcome measures based on the achievement of individual goals set for each child (for example, dressing, holding a pencil).

Physiotherapy

The team within Gateshead work collaboratively to maximise children's potential.

The physiotherapy team also run regular orthotic clinics supported by an Orthotist. Physiotherapy in school is integrated into the school day.

There is currently a short wait for children's physiotherapy within Gateshead with children seen promptly.

The team collect a variety of outcome measures including those relating to CIPPS (Cerebral Palsy), GMFCS (Cerebral Palsy), AIMS (Delayed development), Beighton Scale (Hypermobility), Wong Baker Scale (Pain), Two-minute walk test (Mobility), Goal Attainment Scale (all children), Modified Ashworth Scale (children with neurological difficulties), Pirani Scale (Talipies), Star Balance Scale (children with neurological difficulties).

The Committee was concerned about the impact of resource shortage on contact time being reduced in therapies.

Significant challenges around selective muteness and potential future cases around motor control were both highlighted as consequences of COVID 19.

Links have been established in schools to identify difficulties that children may be experiencing, there is also consideration being made of best practice across the region.

The Committee was pleased to hear about the holistic approach and the work done to include schools in therapeutic work.

RESOLVED

- i. To circulate further information to the Committee on cases of selective muteness.
- ii. The Committee noted the report.

F115 OVERVIEW OF THE DELIVERY OF MENTAL HEALTH SERVICES FOR CHILDREN AND YOUNG PEOPLE

F116 WORK PROGRAMME

The Committee received a report on the work programme for the OSC meetings. The 2023/24 work programme remains provisional.

RESOLVED

- i. The Committee noted the report.

F117 DATE AND TIME OF NEXT MEETING

The next meeting will take place on 18 January 2024, 13:30 in The Bridges Room.
